Annexure 5: Basel III Pillar 3 Disclosures

1. Scope of Application

CSB Bank Ltd (formerly Catholic Syrian Bank Ltd) is a commercial bank formed on 26th November 1920 with Registered Office at Thrissur. In August 1969, the Bank was included in the Second Schedule to the Reserve Bank of India Act 1934. The bank has no subsidiaries.

2. Capital Structure

Qualitative Disclosures:

As per Basel III guidelines, the Bank is required to maintain a minimum Capital to Risk Weighted Assets Ratio (CRAR) of 9% {11.5% including Capital Conservation Buffer (CCB)}, with minimum Common Equity Tier I (CET1) of 5.5% (8% including CCB) as on 1st October 2021. The minimum capital required to be maintained by the Bank (including CCB) for the period ended 30th September 2024 is 11.5% with minimum Common Equity Tier 1 (CET1) of 8% (including CCB of 2.5%).

Bank's capital structure consists of Tier 1 and Tier 2 capital. The major components of Tier 1 capital are equity share capital, equity share premium, statutory reserves, general reserves, special reserve (Section 36(i)(viii) of Income Tax Act) and capital reserves and revaluation reserves (after discounting). Tier 2 capital consists of provision for standard assets, provisions held for country exposures and Investment Fluctuation reserves. Bank has not issued any Upper Tier 2 bonds or perpetual debt or other innovative instruments.

Quantitative Disclosures:

The breakup of capital funds is as follows:

₹ in million

	As on 30.09.2024	As on 30.06.2024

Total Eligible capital [A] + [B]	39,508.01	38,894.50

3. Capital Adequacy

Qualitative Disclosures:

In accordance with the guidelines of RBI, the bank has adopted standardized approach for credit risk, basic indicator approach for operational risk and standardized duration approach for market risk for computing capital adequacy. Basel III Capital regulations are applicable to Banks in India from 1st April, 2013 and is fully phased in by 1st October 2021. Detailed guidelines on Basel III Capital Regulations and Guidelines on Composition of Capital Disclosure Requirements are issued by RBI and consolidated under the Master Circular – Basel III Capital Regulations May 2023.

Regulatory Capital Adequacy position (as per Basel II & Basel III norms as made applicable by RBI) is assessed periodically. Besides, the bank also assessed its own internal estimate of risk capital based on its Board approved ICAAP policy and Stress Testing Policy to cover the Pillar 2 risks. Risks are assumed in line with the Bank's risk bearing capacity and capability in order to generate yields, taking risk-return frontier into account. This aims to ensure that risks that could jeopardize the Bank's existence are avoided.

4. Credit Risk: General Disclosure

Qualitative Disclosures

a) Definition of past due and impaired loans

Bank strictly adheres to RBI norms regarding definitions of past due and impaired loans, as under (in brief):

- i) Interest and or installment of principal remain overdue for a period of more than 90 days in respect of term loan accounts
- ii) the account remains 'out of order' (the outstanding balance remains continuously in excess of the sanctioned limit/drawing power, in cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period) in respect of Overdraft/Cash credit accounts. In case of interest payments in respect of term loans, an account will be classified as NPA if the interest applied at specified rests remains overdue for more than 90 days.
- iii) The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted
- iv) The instalment of principal or interest thereon remains overdue for two crop seasons for short duration crops.
- v) The instalment of principal or interest thereon remains overdue for one crop season for long duration crops.

b) Credit Risk Management Policy

The bank has put in place a Credit Risk Management Policy which is reviewed periodically to bring in refinements triggered by evolving concepts and actual experience.

The Executive level committee - Credit Risk Management Committee (CRMC) which reports to Risk Management Committee (RMC) of the Board, is responsible for the management and mitigation of credit risk in the bank. Credit Risk Management Department at Head Office level acts as the secretariat of CRMC.

Credit approvals are subject to a well-established and time-tested system of competencies, which act as a framework within which decision making committees are authorized to enter into lending transactions. Responsibility for the approval of loans is dependent on size, security and type of the loan.

Rating migration studies are conducted at quarterly intervals. The findings of the rating migration study brings light many behavioral patterns. Credit Risk Management Department conducts industry-wise evaluation to analyze the latest trends and developments in the industry, their impact on bank's customers, the desirability of taking further exposure, assessment of the quality of bank's exposure to that industry etc.

Credit rating system is in force using various CRA formats to measure the risk involved in each borrower account. All non-retail borrowers with an aggregate credit limit of above Rs. 25 lakhs, both funded and non-funded exposure taken together, excluding retail loans are subjected to borrower rating. Loans against Deposit Receipts, Housing Loans, Loans against NSC & Insurance policies, Gold loans, Retail loans and Staff loans are subjected to portfolio rating.

All stressed credit exposures, 50 lakhs and above (SMA1 and SMA2) shall be reviewed monthly by the executive level Committee-Large Advance Committee to detect delinquency signals at an early stage and enable the nursing of the account. All standard credit exposures above Rs.200 lakhs will

be reviewed by Large Advance Committee on a quarterly basis. Besides this, all credit exposures above Rs.2500 lakhs shall be subjected to detailed review by FMG Committee on a monthly basis.

.

Bank has subscribed CRISIL Quantix and Internal Risk Score for industry score which is utilized in the evaluation of credit risk proposals. Bank has also subscribed EWS software from CRISIL which should alert the bank about some external wrongdoings in the loan accounts, which may turn out to be fraudulent. Bank is in the process of procuring RAM model from CRISIL to host rating models in a server. The platform creates centralized repository of rated borrowers with comprehensive information on the rationale of each of the rating awarded.

5.Credit Risk: Disclosures for portfolios subject to standardized approach Qualitative Disclosures

In accordance with RBI guidelines, the bank has adopted standardized approach for computation of capital for credit risk.

Bank Loan Ratings of CRISIL, CARE, ICRA, ACUITE (SMERA), INFOMERICS and India Ratings are considered for arriving at the capital requirement. Risk weight of exposure to corporate and NBFC's computed on the basis of RBI circular vide ref no. RBI/2022-23/125DOR.STR.REC.71/21.06.201/2022-23. As per this circular, external rating of borrower is considered for computation of risk weight only if name of borrower and facility rated is available in the PR issued by credit rating agency.

Bank extends external rating of other issues of the borrower to unrated claims only when the issue specific rating maps to Risk Weight higher than that of the unrated exposure

6. Credit Risk Mitigation: Disclosures for standardized approaches Qualitative Disclosures

A Credit Risk Mitigation and Collateral Management Policy, addressing the Bank's approach towards the credit risk mitigants used for capital calculation is in place.

Following items are considered for on and off balance sheet netting:

- a) Deposits with specific lien to the facility
- b) Subsidies received (for priority sector advances)
- c) Claims received (for NPA accounts)

Of the eligible financial collaterals, the types of collateral taken by the bank are gold ornaments and bank's own deposit receipts. Gold ornaments are accepted as collateral by branches after due scrutiny and are marked to market value on a daily basis. Bank has made an assessment of market liquidity risk involved in liquidating gold ornaments and is considering a holding period of 21 days for advance against pledge of gold ornaments. In Pillar 1 capital adequacy computations, bank considers a haircut of 22% (after scaling up the standard supervisory haircut of 15% to a 21 day holding period). In addition to this, bank is maintaining extra capital for its gold loan portfolio in Pillar 2 capital computations.

The types of guarantees recognized for credit risk mitigation are guarantee by central government, state government, ECGC and banks (in the form of bills purchased/discounted under Letter of credit).

Collaterals other than financial collaterals that secure the credit portfolio of the bank are land & building, plant & machinery and current assets of the counter party. Land and Building includes commercial building, residential property and vacant land.

7. Market Risk in the Trading Book

Qualitative Exposures

- (1) The Bank follows Standardized Duration Method for computing capital requirement for Market Risk.
- (2) Market Risk Management Department (MRMD) is functioning as a part of Integrated Risk Management Department of the Bank, in terms of Governance structure approved by the Board of the Bank.
- (3) MRMD is responsible for identification, assessment, monitoring and reporting of market risk associated with Treasury Operations.
- (4) The following Board approved policies with defined Market Risk Management parameters for each asset class are in place:
- (a) Market Risk Management Policy comprising various Market Risk Limits
- (b) Investment Policy
- (c) Forex Policy
- (d) Stress Test Policy
- (5) Risk monitoring is an ongoing process and risk positions are analyzed and reported to Top Management of the Bank, ALCO and Risk Management Committee of the Board.
- (6) Risk management and reporting is based on parameters such as Modified Duration, PV01, Maximum permissible exposures, Value at Risk Limits, Limits on various investment categories, Risk appetite limits in line with best banking practices.
- (7) Forex Open position limit (Daylight/Overnight), Stop Loss Limit, Aggregate Gap Limit (AGL) and Individual Gap Limit (IGL) as approved by the Board is monitored and exceptions, if any, are reported to Top Management of the Bank, ALCO and Risk Management Committee of the Board.
- (8) Value at Risk (VaR) is computed on a daily basis. Stress Testing is carried out at quarterly intervals as a complement to Value at Risk. Back Testing entails a formal testing and accounting of exceptions on a quarterly basis. Results are reported to ALCO and Risk Management Committee of the Board.
- (9). Stop Loss limit / Take profit limits as prescribed in Investment Policy are also adopted in Market Risk Management Policy for monitoring purposes for individual investments and exposure limits for certain portfolios have been prescribed.

Total	2,402.66	3,082.07	193.49	215.37

8. Operational Risk

Qualitative Disclosures

The Executive level committee - Operational Risk Management Committee (ORMC) which reports to Risk Management Committee (RMC) of the Board, is responsible for the management and mitigation of operational risk in the bank. The bank has framed Operational Risk Management Policy duly approved by the Board. Other policies approved by the board that deal with the different facets of operational risk are Inspection Policy, Human Resource Management Policy, IT Policy, Compliance Policy, Business Continuity & Disaster Recovery Plan and Outsourcing policy.

Bank has obtained Bankers' Indemnity Policy to cover the risk of cash in transit and cash and securities including gold ornaments kept at branches. Risk Based Internal Audit (RBIA) is operational at all the branches.

Bank is adopting Basic Indicator Approach for arriving at capital charge for operational risk in compliance with RBI guidelines and is in the process of building database for moving to Advanced Approaches.

Cyber Risk: Cyber Risk can be defined as the risk connected to online business activity such as Internet Banking, Mobile Banking, Electronic Systems and storage of sensitive Information over computer networks. Common categories of Cyber Risk include inter-alia, Hacker Attacks, Data Breach, Virus / Malware transmission and Cyber Extortion. Financial gain continues to be a primary driver of the most sophisticated criminal offences and presents evolving challenges as criminal networks reinvest the revenue they generate into developing more advanced capabilities.

Cyber Risk can drive up costs and impact revenue. It can harm an organisation's ability to innovate and to gain and maintain customers. Cyber risk pose commercial losses and public relations problems, disruption of operations and the possibility of extortion, cyber- attacks. It also exposes an organization to negligence claims, the inability to meet contractual obligations and a damaging loss of trust among customers. Protecting key information assets is of critical importance to the sustainability and competitiveness of business today due to which financial institutions like us are

taking front foot in terms of their cyber preparedness. Because of this and to safeguard our institution from cyber threats, the bank has set up the cybersecurity framework.

Cyber Security Framework: Cybersecurity risks are products of three elements: threat, vulnerability and impact. The Bank has the holistic risk picture based on periodic vulnerability assessment and threat intelligence from advisory bodies such as CERT-In (Indian Computer Emergency Response Team) and IB-CART (Indian Banks – Centre for Analysis of Risks and Threats). The Bank has also invested in advanced systems such as antivirus / anti-malware, threat protection, network firewalls and application firewalls. It continues to invest in enhancing the overall effectiveness of the Bank's security posture to enable the Bank to prioritise and align its resources to detect and respond to cyber incidents quickly and prevent emerging cybersecurity risks.

Information Security Management department headed by Chief Information Security Officer (CISO) was formed to address cybersecurity risks. As part of the cybersecurity framework, proactive security measures adopted by the bank are Managed Security Operations Centre, advanced anti-phishing, anti-malware and anti-rogue services, Privileged Identity Management Solution, Web Application Firewall, Intrusion Detection and Prevention System for protecting network-level threats and for preventing unwanted and malicious network transmissions, Network Access Control which will allow only authorised users to connect to banks network, Data Leakage Prevention solution to prevent data leakage, DDoS mitigation service to prevent Denial of services, DMARC &SPF protection to enhance the email security standards, Vulnerability Assessment and Penetration Testing, SSL encryption for data transfers, network firewall etc., Bank is continuing to invest on advanced technologies to enhance the systems. To evaluate banks preparedness against cyber-attacks, bank participates in the cyber-drill conducted by IDRBT. Bank has always taken continuous steps to create cybersecurity awareness among employees and customers through training/Newsletter/SMS/Emails.

9. Interest Rate Risk in the Banking Book

Qualitative Disclosures

Interest rate risk refers to impact on Bank's Net Interest Income and the value of its assets and liabilities arising from fluctuations in interest rate due to internal and external factors. The interest rate risk is viewed from two perspectives viz. 'earnings perspective' and 'economic value perspective'.

Earnings perspective - The immediate impact of changes in interest rates on bank's earnings in relation to changes in its Net Interest Income (NII).

Economic Value Perspective - The economic value of bank's assets, liabilities and off- balance sheet positions get affected due to variation in market interest rates. Consequently, the net worth gets corrected and is referred to as Market Value of Equity (MVE).

Internal factors include the composition of the Bank's assets and liabilities, quality, maturity/duration, existing rates and re-pricing period of deposits, borrowings, loans and investments. External factors cover general economic conditions.

Rising or falling interest rates impact the Bank depending on whether Balance sheet is asset sensitive or liability sensitive. The Bank identifies inherent risk associated with the changing

interest rates on its on- balance sheet and off- balance sheet exposures in the banking book from both short term and long term perspective.

RBI vide their circular dated 17th Feb 2023, have issued revised guidelines on Governance, measurement and management of Interest Rate Risk in Banking Book (IRRBB) which are in alignment with revised framework issued by BASEL Committee on Banking Supervision. Pending announcement of effective date of operative guidelines on IRRBB, Banks are advised to be in preparedness for measuring, monitoring and disclosing their exposure to interest rate risk in the banking book as per the new guideline. Our bank has initiated pro-active steps to fall in line with Regulatory requirements on this count.

Structure and organization

The Asset-Liability Management Committee (ALCO) is responsible for evolving appropriate systems and procedures for ongoing identification and analysis of Balance Sheet risks and laying down parameters for efficient management of these risks through ALM Policy of the Bank.

ALCO, therefore, periodically monitors and controls the risks and returns, funding and deployment, setting Bank's lending and deposit rates, and directs the investment activities of the bank in line with its interest rate view. The Risk Management Committee of the Board of Directors (RMCB) oversees the implementation of the system for ALM and reviews its functioning periodically and provides direction. It reviews various decisions taken by ALCO for managing interest rate risk.

Scope and nature of risk reporting and measurement systems -

RBI has stipulated monitoring of Interest Rate Risk at monthly intervals through a Statement of Interest Rate Sensitivity under Traditional Gap Analysis (IRS-TGA). Earnings at Risk (EaR) measures the change in Net Interest Income of the Bank due to parallel change in interest rate on both the assets & liabilities.

RBI has also stipulated to estimate the impact of change in interest rates on economic value of Bank's assets and liabilities through Interest Rate Sensitivity under Duration Gap Analysis (IRS-DGA), and is the same is carried out monthly. The impact of interest rate changes on the Market Value of Equity (MVE) is monitored through IRS-DGA by recognizing the changes in the value of assets and liabilities for a given change in the market interest rate. The change in value of equity (including reserves) with 2% parallel shift in interest rates on both assets and liabilities are estimated. Accordingly, ALCO reviews IRS-TGA and IRS – DGA on a monthly basis and monitors the Earnings at Risk and Market Value of Equity.

Key Assumptions for IRRB calculations:

- a) Bulk of the advance portfolio to re-price within 12 months.
- b) Maturity of term deposits considered after adjusting empirically observed premature closure rates.

- c) Savings Bank Deposits portfolio is distributed in buckets less than 5 years as per maturity pattern arrived basis on behavioral analysis.
- d) Current Deposits portfolio is distributed in buckets less than 5 years as per maturity pattern arrived from behavioral analysis in duration gap approach
- e) In the case of EaR approach, Current Deposits are treated as non-sensitive

-200 basis points	5612.35	3062.38

10. Counterparty Credit Risk

Counterparty Credit Risk (CCR) is the risk that the counterparty to a transaction could default before final settlement of the transaction's cash flows. An economic loss would occur if the transaction or portfolio of transactions with the counterparty has a positive economic value for the Bank at the time of default. Unlike exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss whereby the market value for many different types of transactions can be positive or negative to either counterparty. The market value is uncertain and can vary over time with the movement in underlying market factors.

Capital is maintained on the exposure to CCR as per regulatory guidelines on Capital adequacy computation. Capital for Counterparty Credit Risk is assessed based on the Standardized Approach. The exposure is calculated using Current Exposure Method.

The MTM on client exposures are monitored periodically. The Bank does not recognize bilateral netting for capital computation.

Leverage Ratio frame work

Definition and minimum requirement

The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage

Leverage Ratio =Capital Measure/ Exposure Measure

The public disclosure requirements of leverage ratio will begin from January 1, 2015 and the Basel Committee will monitor the impact of these disclosure requirements. Accordingly, banks operating in India are required to make disclosure of the leverage ratio and its components from April 1, 2015 on a quarterly basis and according to the disclosure templates as indicated in paragraph 16.7 along with Pillar 3 disclosures.

Table 1- Summary comparison of accounting assets Vs. leverage ratio exposure method

	Item	(Rs. in Million)
1	Total consolidated assets as per published financial statements	394608.58
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	
4	Adjustments for derivative financial instruments
